

# State Personal Income, 1929-81: Revised Estimates

## *Revision policy*

Preliminary annual estimates of State personal income, which are derived from quarterly estimates, are released each April. The quarterly estimates are based primarily on the Bureau of Labor Statistics' Establishment (790) Survey. More reliable annual estimates, including revised estimates for earlier years, are released in August. The August estimates are

prepared in greater component detail than the quarterly estimates and are based primarily on Federal and State government administrative records. These estimates, with further revisions to the years 1977-81, will form the basis for local area annual personal income as well as revised State quarterly personal income estimates to be released next April.

Comprehensive revisions are initiat-

ed periodically—approximately every five years—at the national level and extended, where appropriate, to the State and local area levels. At the State and local levels, revisions include—in addition to definitional, classificational, and statistical changes at the national level—changes in the subnational distributions made possible by more current data.

Comparable estimates of State personal income—that is, income from all sources received by persons residing in each State—are now available for each year back to 1929. The estimates have been revised to incorporate the comprehensive national income and product accounts (NIPA) revisions presented and described in the December 1980 SURVEY OF CURRENT BUSINESS. Previously, the State personal income estimates had incorporated the comprehensive NIPA revisions only back to 1958.

Table 1 presents total personal income and table 2 presents per capita personal income for 1929-81. Estimates for 1929-47 are published for the first time since 1956, those for 1948-57 for the first time since August 1971, and those for 1958-68 for the first time since August 1979. Estimates for 1977-80 supersede those published in the July 1981 SURVEY, and the estimates for 1981 supersede

the preliminary estimates published in the April 1982 SURVEY.

Tables 8 and 4 present total and per capita disposable personal income for 1958-81. These estimates are presented for the first time since the comprehensive NIPA revisions.

Table 5 presents personal income by type and earnings (labor and proprietors' income) by industry for 1979-81. The estimates for 1979 and 1980 supersede those published in the July 1981 SURVEY. (Estimates for 1977 and 1978 have also been revised, but are not included here because of space limitations.) Detailed estimates for 1981 are presented for the first time.

Information relating to earnings by industry is not entirely consistent throughout the period 1929-81. Estimates for 1958-81 are available at the 2-digit Standard Industrial Classification (SIC) code level, whereas those for 1929-57 are available only at the

1-digit (major industry division) level. Also, the estimates for 1975-81 are based on the 1972 SIC codes, whereas the prior estimates are based on the 1967 codes. Finally, estimates for 1948-81 reflect the State in which the establishment disbursing the income is located (place of work) whereas estimates for 1929-47 reflect the State of residence of the income recipient. Therefore, an explicit residence adjustment is necessary for 1948-81 but not for 1929-47.

Personal income is the income received by persons from all sources, that is, from participation in production, from transfer payments from government and business, and from government interest, which is treated like a transfer payment. Persons consist of individuals, nonprofit institutions, private noninsured welfare funds, and private trust funds. Proprietors' income is treated in its entirety as received by individuals. Life insur-

ance carriers and private noninsured pension funds are not counted as persons, but their saving is credited to persons. Personal income is the sum of wage and salary disbursements, other labor income, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and transfer payments, less personal contributions for social insurance. Per capita personal income is the total personal income of residents (for the year) divided by the resident population as of July 1.

Disposable personal income is personal income less personal tax and nontax payments. Personal taxes include individual income taxes (net of refunds), estate and gift taxes, and personal property taxes. (As noted, personal contributions for social security, government retirement, and other social insurance programs are deducted in deriving total personal income.) Nontaxes include passport fees, fines and penalties, donations, and tuitions and fees paid to schools and hospitals operated mainly by government. Per capita disposable personal income is the disposable personal income divided by resident population as of July 1.

The definitions underlying the State series are, for the most part, the same as those underlying the personal income series in the NIPA's. The major difference is the treatment of U.S. citizens temporarily working or assignment abroad. The State series includes only persons working and/or residing in the 50 States and the District of Columbia. The national series includes, as well, Federal personnel—civilian and military—stationed abroad and U.S. residents employed by private U.S. firms on temporary foreign assignment.

For a summary description of the sources and methods used in preparing national estimates of personal income, see pages 18-40 in the November 1979 SURVEY. A comprehensive State personal income methodology is being prepared by the Regional Economic Measurement Division.

The personal income estimates presented here, as well as more detailed tabulations, are available from the Regional Economic Information System in magnetic tape, microfiche, and computer printout form. (Revised estimates for 1968-78, in detail similar to that presented in table 5, as well as estimates for 1929-67 with less industrial detail, are now available.) Samples of tables are available on request. A magnetic tape containing a set (United States, regions, and States) of

State tables costs \$180. A microfiche (24x) containing a set of State tables costs \$10. Computer printouts are available at a cost of \$2 per table, with a maximum charge of \$100 for a set of State tables. There is a minimum charge of \$5 per request. Requests should be addressed to Regional Economic Information System, Regional Economic Measurement Division, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, D.C. 20230.

#### Acknowledgments

The personal income estimates were prepared under the direction of Edwin J. Coleman, Chief, Regional Economic Measurement Division. The comprehensive revisions were coordinated by Linnea Hazen. All revisions for 1929-47, civilian government revisions for 1948-67, and disposable personal income revisions for 1968-76 were prepared by Vivian G. Conklin. Text was prepared by Wallace K. Bailey, tables were prepared by Enrice P. James, and secretarial support was provided by Valeria A. Hamilton, Regional Economic Information System Branch.

Estimates of civilian nonfarm wages and salaries and other labor income were prepared under the supervision of Elizabeth H. Queen, Chief, Regional Wage Branch. Major responsibilities were assumed by: Sharon C. Carnevale, Carol E. Evans, Michael G. Pilot, Chen T. Poncouver, William E. Reid, Jr., Victor Schedachny, James M. Scott, and Phillip F. Simon.

Estimates of farm income were prepared under the supervision of Kenneth P. Berkman. Estimates of nonfarm proprietors' income and of dividends, interest, and rent were prepared by Arthur L. Sensenig and Charles E. Jolley, under the supervision of Linnea Hazen.

Estimates of Federal military income, transfer payments, personal contributions for social insurance, and disposable personal income (1977-81) were prepared under the supervision of Robert L. Brown, Acting Chief, Quarterly Income Branch. Major responsibilities were assumed by: Gary V. Kennedy, John M. Reed, and Isabelle B. Whiston.

Residence adjustments, disclosure avoidance, and final preparation of the State personal income estimates were performed under the supervision of David W. Cartwright, Chief, and Vivian G. Conklin, Assistant Chief, Regional Economic Information System Branch. Major responsibilities were assumed by Wallace K. Bailey and Paul M. Levit.

1. The personal income level shown for the United States differs from that in the national income and product accounts, primarily because it omits income received by Federal Government employees overseas. Alaska and Hawaii are not included in the U.S. totals prior to 1968.

and Regions, Revised 1929-81<sup>1</sup>—Continued
